SUMMARY

Business Analytics graduate (Deakin University, Oct 2025) with a Computer Science foundation (9.34/10 GPA). Built three end-to-end analytics projects - analysed 780,000+ e-commerce transactions in SQL, uncovered Airbnb pricing drivers with Python, and investigated 278,000+ NYC restaurant inspection records - plus automated a 40,000-record data pipeline as an intern. Skilled in RFM segmentation, cohort retention, and dashboarding, with a track record of turning raw data into decisions.

EXPERIENCE

Data Specialist Intern / *KAKScorp* Jun 2025—Jul 2025 | Remote

- Engineered a Python data-extraction pipeline (**BeautifulSoup4**, **Selenium**) processing 40,000+ records, cutting manual effort 70%
- Transformed raw, unstructured data into BI reports that directly informed stakeholder decisions
- Surfaced prospect trends via statistical analysis, sharpening targeting accuracy for business development

Sales & Operations Associate / *Punjab Imports* Aug 2025 - Present | Melbourne, AU

- Balanced full-time master's study with inventory and sales operations in a high-volume retail environment
- Resolved customer issues in real time, sharpening time-management and problem-solving under pressure

PROJECTS

Customer Behaviour SQL Analysis / *Personal Project* 2026

- Mined 780,000+ transactions in **MySQL** across RFM segmentation, cohort retention, market basket, and revenue-trend analysis
- Found 600 Champion customers (10% of base) drove 49% of £9.7M revenue, confirming the Pareto principle
- Modelled cohort retention - 65-80% first-purchase churn, September as peak-growth month (+38–48% MoM) - using **CTEs**, **window functions**, **self-joins**

NYC Restaurant Survival Analysis / *Personal Project* 2026

- Analysed 278,000+ inspection records across 27,649 restaurants to identify what drives restaurant survival
- Uncovered that Queens' violation rate (6.27) topped Manhattan's (5.21) only after normalising for restaurant count, and that scores worsened consistently post-COVID (17→23, 2022–2026)

Airbnb Albany Pricing EDA / *Personal Project* 2026

- Explored 426 listings in **Python (Pandas, Seaborn)** to test assumptions behind pricing
- Overtured the assumption that reviews drive price ($r=0.09$) - capacity was the real driver ($r=0.53$)

SmartStream E-Commerce Analytics / *Deakin University* T2 2025

- Segmented 9,000+ transactions via RFM in **BigQuery** for targeted marketing campaigns
- Designed **Power BI** dashboards behind a 15% lift in business performance - awarded High Distinction

EDUCATION

Master of Business Analytics, Marketing Specialisation / *Deakin University* Feb 2025 - Oct 2025 | Melbourne, AU

- High Distinction, Marketing Analytics - analysed 9,000+ transactions to drive a 15% performance lift

Bachelor of Engineering, Computer Science / *Chitkara University* 2020 – 2024 | India

- CGPA: 9.34/10 - First Class Honours equivalent

SKILLS

- Data & SQL:** MySQL, BigQuery, CTEs, Window Functions, RFM Segmentation, Cohort Analysis, A/B Testing, ETL
- Python:** Pandas, NumPy, Matplotlib, Seaborn, BeautifulSoup4, Selenium
- BI & Visualization:** Power BI, Tableau, Advanced Excel, Google Sheets
- Tools:** Git, GitHub, Jupyter, Google Colab, MySQL Workbench, RapidMiner
- Certifications:** Siemens Teamcenter X Associate, Power BI Essential Training (NASBA)
